APPROVAL OF STATE ENGINEER		
This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:		
right obtained under this permit will be dependent upon the amount of water actually placed to beneficial use. It is also understood that this right must allow for a reasonable lowering of the static water level. This well shall be equipped with a two (2) inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of water begins, or before the Proof of Completion of Work is filed. This source is located within an area designated by the State Engineer, pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.  This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands. (CONTINUED ON PAGE 2)		
The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to		
exceed 0.10 cubic feet per second but not to exceed 2.24		
acre-feet annually.		
Work must be prosecuted with reasonable diligence and be	e completed on or before September 4, 1997	
Proof of completion of work shall be filed before	October 4, 1997	
Application of water to beneficial use shall be filed on or before		
Proof of the application of water to beneficial use shall be filed on or before		
Map in support of proof of beneficial use shall be filed on	or before

(PERMIT TERMS CONTINUED)

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

This permit is issued under the provisions of NRS 534.120(2) as a preferred use.
